QUALITY PRODUCTS FOR HAMS, FROM HAMS SINCE 1978!

Monday, March 3, 14

NO SMOKING  
NO FUMAR

The trade show booth features a grid of eight informational posters. The top row includes: 1) A poster showing fiber optic cables and connectors. 2) A poster titled 'NEMAL FIBER OPTICS FOR HD' with technical diagrams. 3) A poster titled 'NEMAL' with a blue background and technical details. 4) A poster showing fiber optic components. The bottom row includes: 5) A poster titled 'Complete Line of Coaxial and Fiber Optic Cables' with a list of products. 6) A poster titled 'NEMAL' with 'CABLES AND ACCESSORIES FOR NIM/CAMAC'. 7) A poster showing fiber optic cables. 8) A poster titled 'NEMAL' with technical information.

The trade show table is covered with a blue tablecloth and displays a variety of fiber optic products. On the left side, there are several green and blue trays containing small components and connectors. In the center and right, there are several large coils of black fiber optic cables. Some cables are laid out on the table, while others are stacked. The table is supported by metal legs.

**Digital Modes**  
 Take control of your radio direct from your computer. Changing your frequency and mode are just a few mouse clicks away. All options are dependent upon the CAT controls in your specific radio.

**Auto Tune**  
 Get rid of your hands and feet and let the program do the work for you. Auto tune will automatically tune your radio to the best frequency for the mode you are using.

**DIGI**  
 Handle all of your digital modes in one window. DIGI also supports a variety of digital modes so you can handle all of the CW, RTTY, and PSK signals based upon the bandwidth of your radio or IC7 that is being used.

**Logbook**  
 Logging contacts has never been easier. The improved version of HRD's Logbook not only logs your contacts but also helps you track your awards and fight corruption, upload directly to LOTW, EQSL, and HRDLog.

**Power Control**  
 Fully tune your antenna match a signal without leaving your station.

**Great Line Map**  
 Track the current to determine the best area of propagation for making contacts at long distances.
