

Hey! I'm off to
learn about

Amateur Radio

**Almost ...
anything you can think of
in modern communications,
we radio amateurs can do!**

**Radio Amateurs
can talk to others
around New Zealand,
and around the world.**

We can talk with our voices. We can talk with Morse code. We can hook our personal computers to radios to "talk" with our fingers at the keyboard.

We even have our own satellites up in space to relay our signals.

If you like competitive sports
- we have contests.
If you like to take things apart
to see how they work
- we have a long history of that!

If you like to make home videos
- we have Amateur TV.
If you just like to make friends and talk
- Amateur Radio is G R E A T !
You don't need all sorts of technical
degrees to become a Radio Amateur.

**You're invited to this Meeting
to learn how you can
become a
Radio Amateur:**

*(Stick details of your meeting
on here - before photocopying!)*

*Name of Branch,
date, time, place of meeting,
and contact phone number)*
