💻FLASH WITH A BROWSER💻

I suggest you choose one of the following two versions:

📺 Bandscope version (without FM broadcast support)

📻 Broadcast version (without bandscope support)

Last chance... if you can't decide between these two versions, you can always take the version below. It retains support for Broadcast FM and Bandscope. But VOX support has been removed...

⏱ Bandscope & Broadcast version (without VOX support)

📔 Up to date manual available in a Wiki section 📔
⭐ Dedicated CHIRP driver available at uv-k5-chirp-driver ⭐

Changes

- Split in 2 versions : bandscope or broadcast FM,
- Fix issue #142 (menu 17 ChName),
- Fix issue #138 (next keypress eat),
- Fix issue #131 (backlight level 1 & 2),
- Improved management of long names in menus,
- Remove AM Fix menu (AM Fix is enable by default),
- Add CA HAM F_LOCK for Canadian zone,
- Add GMRS/FRS/MURS F_LOCK for North America zone,
- Improve Spectrum Analyser and add channel name,
- Improve memory channel input,
- Improve scan lists :
  - Add new list 3,
  - Add new list 0 (channel without list…),
  - Add new scan options :
    - Scan list 0 (all channels without list),
    - Scan list 1,
    - Scan list 2,
    - Scan list 3,
    - Scan lists [1, 2, 3],
    - Scan all (all channels with ou without list),
  - Add scan list shortcuts.

Bandscope version, 2 931 bytes left.
Broadcast version, 4 627 bytes left.
Bandscope & Broadcast version (without VOX support), 79 bytes left.

Enjoy,

Armel F4HWN.
