

We Need to Take Action

- ▶ If you experience interference, file a public complaint online with the FCC and obtain a ticket number <https://consumercomplaints.fcc.gov/hc/en-us>
- ▶ The FCC has also asked that we call the “Stop Buzzer” number(s) documented in their license application narrative
 - ▶ Report the interference and request they cease testing
- ▶ We know that previous calls to the published numbers went to voice mail
- ▶ The Chaos attorneys recently asked the FCC to revise their license(s) to add a new “Stop Buzzer” number.
 - ▶ That number is, “*Jason Chlipala at 610-349-0104*”.
 - ▶ If they don’t answer or don’t cease, notify Skip
- ▶ Promulgate this information as much as you can
- ▶ *We need to record the dates and times of each incident, ticket numbers and whether the interference stopped when the “Stop Buzzer” number was called*
