

These are the Army Cadets, Harry, Roddy, Martina and I had these cadets set up working telephone land line comms hand held radio comms linking back Mobile comms vehicle and onward to base radio simulating an attack on the High school which was destroyed by shells.

It was so well done by the Cadets, all wanted us to visit again and seven asked if they could have more instructions re Amateur radio.

These Cadets including their Officer were to have done this in March but due to Covid had to be called off.
