

Columbia County area repeater information

Updated August 16,2025

This document is to provide information about our repeaters and some additional information concerning their use.

In case of emergency situations, designated repeaters can be prioritized to support the emergency effort and normal repeater use will be suspended during the event. The trustees of the repeaters listed here have agreed to have the repeaters used for emergency operations. Repeaters not listed are currently not available for ARES to use during an emergency.

It is of course expected that you will follow all FCC rules.

Located at the North Tower near I-10 on 441:

145.490 -.600 (144.890) Analog repeater, call sign is NF4CQ, *Doug Baker WB4VFT Trustee*

Located at the South Tower on Hwy 47S:

147.180 +.600 (147.780) Analog repeater, call sign is NF4CA Analog repeater. *Brad Swartz N5CBP Trustee*

SARNET 444.900 +5M (449.900) Statewide repeater system. Repeater call sign is NF4CQ. During an emergency, this repeater is primarily used by the State EOC as a statewide emergency network service. *Doug Baker WB4VFT Trustee*

D-Star repeater, 147.150 +.600 (147.750) NF4CA C

The default setting on this repeater is “not linked”. You may connect to any reflector as long as you unconnect when finished. Please always ask if the repeater is in use before linking or un-linking with a reflector. *Brad Swartz N5CBP Trustee*
