

Agenda:

1. Finalize the recommendation of the team for the use of radios by ERT...
2. -discuss their request to have a "converta-com" type arrangement to up their power when in vehicles or at a fixed location -is it legal, needed or how to best approach it.
3. Review our plan for our first live training event in Hialeah March 6 2021 and there after
4. -particularly would a Friday Evening practice set up of the PCC be worth while for the Logistics folks to bring it to all of our locations. I would propose we limit this call to an hour.

As an aside I plan to be at the PCC in LY on Wednesday PM December 2 and stay there though the following Sunday to complete the identified issues on the Action Item List, particularly with the DC bus, grounding and the generator and fuel system operation -so we can have a training segment on each of these.

Minutes from Meeting

1. Discussion around repeater License
2. Fuel Issues on Diesel Tank
 - a. Mike has a pump to drain tank (60-70gal) has local container via water separator (dip tube will pull fuel)
 - b. Mike briefed plan
3. 4th Wednesday Training - we get 5 days in the satellite subscription monthly
 - a. Gives training opportunity on the satellite system and actually transfer data
 - b. Check out Level 2 team members
4. Radios - Repeater
 - a. Discussion
 - b. Recommend pursue a nationwide itinerant license
 - i. Recommend pursue the mobile radios as the license type given there are no 'handheld' category
 - ii. 25 radios powered on at a given time
 - c. Recommendation - Mike Crisler asked Gordon Gibby to Reach out to Marvin Corbin around pursuit / application
5. Brief discussion on 32-34 which is the cable connectivity to the host location from the PCC
 - a. Don't want to invest too much with advent of starlink satellites
 - b. Ubiquity routers may be the solution to extend the PCC network connectivity
 - c. Plan ubiquity prep for field day
 - d. Emphasis to get qualified on the manlift to put up antennas

6. ERT system update
 - a. 2 radios antennas - demo kit
 - i. Idea - evaluate MURS by our customer
 - ii. MURS is VHF
 - iii. If benefactor has resources - may purchase 35
 - iv. Testing will be with Luther & Team from vehicle to a fixed mast
