

50 Ω

75 Ω

DC - 6 GHz

INTRODUCTION

- Subminiature coaxial connectors
- "Push-pull" snap-on mating
- Complies with specification CECC 22220
- CEI standard 1169-36

APPLICATIONS

50 Ω models :

- Wireless communications
- Civil and military radio-telecommunication equipment

75 Ω models :

- Videocommunication
- Television broad casting

The **MCX series** utilizes the SMB series electrical line and features a particularly simple, compact and robust interface.

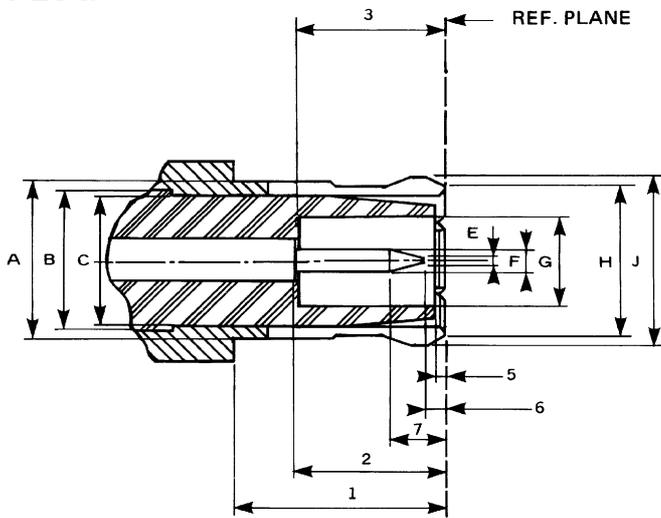

The MCX series is 30 % smaller than the SMB.

The **MCX series** helps to **miniaturize equipment**. It lowers wiring connection costs through its full crimp and solder-crimp versions as the center contact of the straight models can be either crimped or soldered. It optimizes PCB layouts with its range of models for PCBs including surface mount and press-fit receptacles.

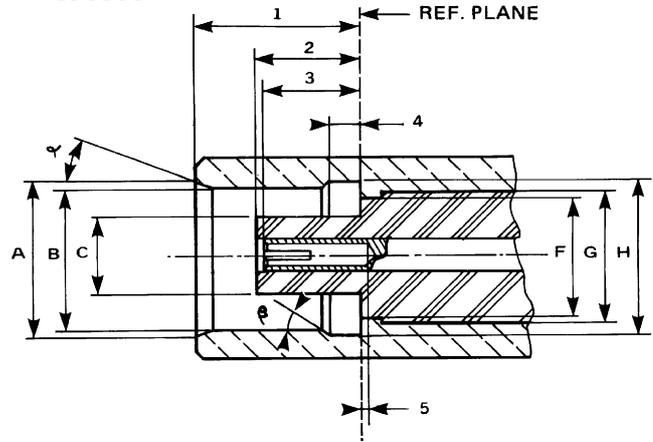

This catalog also includes the whole range of PCB solder coaxial cable terminals (see pages 18/20).
