

The Santa Fe ARES voice net takes place at 7:30 PM MT on the Tuesday prior to the third Saturday of the month. (Our monthly meetings are on the third Saturday). A number of local 2-meter repeaters are available, and typically used for the net. The repeater choice is determined by the Net Control operator and if they can access the repeater. A prepared script is available for the Net Control operator to use to facilitate the net.

There are four Tuesday 7:30 PM MT scheduled nets for the remainder of 2024:

September 17

October 15

November 12

December 17

Net Control operators are needed for the above dates. It seems the same small group of SF ARES members volunteer for these nets. This is an opportunity for those SF ARES members that have never been Net Control to hone their operating skills. Let me know if you're interested in any of the dates listed above. I can provide the prepared script and walk you through a typical net. We can even practice on the air.

Thank you,

Steve Mesko - WB7Y  
President, SF ARES
