

IC-703 MARS/CAP mod

Out of Band modification for the IC-703

TX Frequency Expansion:

TX Frequency Coverage After Modification: 0.10 to 60.0 MHz

Procedure of TX Frequency Expansion:

Remove **D5807** and **D5806** from the MAIN board to expand transmit frequency coverage above.

Notice: Frequency range and specifications can not be guaranteed after modification.

This modification is for MARS/CAP operation only.
