CHAIRPERSON'S

Greetings,

On behalf of the Mecklenburg Amateur Radio Society and the 1995 Charlotte Hamfest Committee, we wish to welcome you to the 1995 Charlotte Hamfest and ComputerFair. Our committee has worked hard to bring you a great Hamfest this year. As always we value your support of the Charlotte Hamfest and ComputerFair because without all of you there would be no Hamfest.

Our facility has very convenient parking but please remember the Charlotte Hamfest has no control over parking fees and does not collect proceeds from parking. This is controlled by the Merchandise Mart and the parking fees are actually set by the City of Charlotte.

We have some great forums on the program for this year and hope you will check these out and enjoy them. The forum scheduled is listed in the program. Also, new for the ladies this year is a Ladies Hospitality Room which is open on Saturday from 10:00 A.M. to 4:00 P.M. Bring your craft projects and work on them. Also, in the afternoon we will have a special "Bow-Making" Class for the ladies. Come on up and learn how to make the real fancy bows. We will provide the supplies.

We hope you have a great weekend at the show and safe trip home. Mark your calendars to return on March 9 & 10, 1996 for the 1996 Charlotte Hamfest and ComputerFair.

73's

Mary Hunt, KA4EXP
Hamfest Co-Chairpersons

SPIRIT-2 High Performance Packet Controller

No, you didn't
misread the
name! The
SPIRIT-2 is
identical to the
previously ad-
vertised
SPRINT-2.
We changed
the name.

A new single-port TNC with the power and features for use as a home station TNC, a 9600 baud satellite TNC, a network node, a BBS 9600 baud port, or a DX PacketCluster TNC.

- A genuine G3RUH modem with selectable filters supports 9.6kbps to 57.6 kbps.
- Both modem and terminal baud rates up to 57,600 bps for future networking and satellite service.
- 10 MHz CPU clock speed (20 MHz optional), 128k RAM standard, 64k EPROM.
- Full support for Global Positioning System receivers and Automatic Packet Reporting System.
- Personal Message System with 64k message storage space and many advanced features.
- Deviation and signal strength of received signals, voltage and temperature measurements using the optional AD-4 Analog to Digital Accessory board.
- Extensive EMI and power spike filtering, quiet four-layer circuit board.
- Ideal for network use - TheNet, ROSE, or Texnet. Built in CoaxLAN avoids complex diode matrices.
- Satellite model can uplink at 9.6kbps and downlink at 38.4kbps, full duplex or 9.6kbps both links.
- \$225 including power supply and cables. (Satellite model \$235, 20 MHz Backbone model \$260).

DEMAND THE BEST

DJ-582T Superior Performance

The Right Features. The new Alinco DJ-582T offers you a distinct alternative to the many radios on the market today that inconvenience the user with unnecessarily difficult operation. Alinco's DJ-582T gives you everything you want in a handheld with the kind of user-friendly design even the most advanced amateur radio enthusiasts will appreciate. Improvement on previous models include an accelerated scan speed up to 2 times faster, a separate low power PTT switch, and a highly durable keypad.

Sophistication. Providing cross-band repeat, full duplex operation, a backlit keypad, 8 scanning modes, CTCSS encode and decode, DSQ private paging, and an exceptional receive capacity of 130-174 MHz, 420-474 MHz, and AM 108-136 MHz.

Power. The DJ-582T delivers a full 5 watts of power with the optional EBP-22N 12V battery, and our EMS-8Z Remote Speaker Microphone offers remote command of memory channels, plus scanning features.

- 130.000 - 173.995 MHz FM (RX)
- 144.000 - 147.995 MHz FM (TX)
- 108.000 - 136.000 MHz AM (RX)
- 420.000 - 470.000 MHz FM (RX)
- 438.000 - 449.995 MHz FM (TX)
- Cross Band Repeat
- Super Low Battery Consumption Function
- Full Duplex and Dual Watch Capability
- CTCSS Encode and Decode Standard
- 8 Scanning Modes
- Odd Splits on All Memory Channels
- Illuminated Key Pad
- Auto Power Off
- Channel Display Mode

DJ-G1T (2M HT)

The ALINCO DJ-G1T offers a rare combination found in today's HT's:

Compact Construction and a User Friendly Control Design. The Ham operator has easy access to both the dial controls and DTMF keypad, and the Large LCD display adds to the convenience giving you a clear readout of the operating frequency.

Bonus Feature!! CHANNEL SCOPE

Alinco's Channel Scope technology allows you to visually monitor activity on your favorite frequencies as you simultaneously tune into your local repeater. The DJ-G1T displays signal strengths of 7 memory channels at a time to ensure that you don't miss out on the action. The DJ-G1T is the first of its kind to offer this incredible feature, easily accessible with just a couple of keystrokes.

- 108.000 - 173.995 MHz RX
- 440.000 - 449.995 MHz RX
- 144.000 - 147.995 MHz TX
- Extra Large LCD Display
- 80 Memory Channels
- Auto Dial Pause
- 5 Auto Dialer Memories
- DSQ Paging Feature
- Cross-Band Semi Duplex
- 6 scan modes
- Odd Splits on All Memory Channels
- Low Battery Voltage indicator
- Auto Power Off
- CTCSS Encode standard

Better Products, Better Service. See for yourself why people are coming to ALINCO.
